

VIVID™ ACID STAIN

VIVID™ is a single-component, penetrating, reactive acid stain that produces beautifully variegated, mottled or antiqued-looking concrete surfaces. The multi-colored, distinctive nature of the stain can instantly upgrade the look of ordinary concrete to that of opulent marble, granite or stone. Due to the variable coloring and intensities of the finish, no two applications will look exactly alike, adding to its overall captivation and allure.

- PENETRATING CHEMICAL STAIN
- VARIEGATED COLOR
- INTERIOR & EXTERIOR USE

BENEFITS

CHEMICAL REACTION

Penetrates the substrate and reacts with minerals present in cured concrete, resulting in a permanent decorative finish that will not chip, crack, peel or degrade. Excellent weatherability, durability and UV resistance make this versatile enough for both interior and exterior applications.

ORGANIC MOVEMENT

Transform ordinary concrete surfaces into "high-end" with the striking looks of higher quality materials, at a fraction of the cost. Apply at full strength or dilute for an endless supply of coloring effects and truly one-of-a-kind results.

INTERIOR & EXTERIOR USE

Durable enough for the toughest exterior applications yet elegant enough for the most luxurious interiors. Apply VIVID™ to restaurant, hotel and showroom flooring, patios, pool decks, driveways and countertops. The possibilities are only limited by your imagination!
